

How to accelerate your FedRAMP compliance journey

Anitian Compliance Automation System delivers a fast, cost-effective path to FedRAMP readiness and authorization.

\$74B

US federal government plans to invest in federal technology in 2024.¹

To open doors to federal markets and unlock new revenue opportunities, software-as-a-service (SaaS) providers need to successfully navigate the Federal Risk and Authorization Management Program (FedRAMP). However, getting FedRAMP compliant can take up to two years, cost millions, and strain your people, resources, and roadmap.

Why Anitian? Half the Time and Half the Cost.

Anitian combines decades of hands-on federal compliance expertise, leading-edge cloud-based technologies, and compliant-by-design infrastructure to help our customers accelerate, navigate, and automate their FedRAMP journey.

Fully managed security and compliance:

Integrations and automations take care of critical patches, upgrades, tuning, and maintenance.

World-class experts:

We offer real-time guidance from a team of FedRAMP experts with support and tools from Amazon Web Services (AWS).

All-in-one platform:

Pre-configured security technologies, compliant-by-design architecture, and AWS-native tools are all provided in one place.

Customer success

SentinelOne partnered with Anitian and became FedRAMP-Moderate audit ready within 10 weeks and achieved Authority to Operate (ATO) in eight months.

66

I brought Anitian in because they had a pre-configured security stack, so I didn't have to worry about making compliance work or getting past my audit.

– **Chris Bates, CISO,**
SentinelOne

Get your SaaS app or service audit ready in **half** the time and at **half** the cost.
