

Why you should automate your indirect tax processes

Get your taxes right the first time, every time

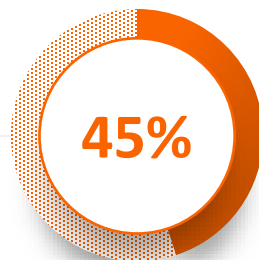

Calculating, collecting, and reporting indirect tax gets more complicated as a business grows. Automated processes lower risk, drive efficiency, and maximize opportunities.

57% of tax departments expect significant change to government requirements in the next 1-2 years¹

Greater accuracy and compliance

Update tax rates and rules automatically to stay on top of requirements and avoid down-time. Cloud-native technology automates how you stay on top of the latest tax regulations.

45% of tax departments introduced automation to address strained resources—the most common strategy cited¹

Increased efficiency

Eliminate manual tax management to enable focus on more strategic initiatives that promote business growth. Seamless and flexible cloud-native software automatically calculates volumes of indirect tax in milliseconds.

\$1M+

Adobe saved by exposing their source of tax risk moving to a single platform, Reducing unnecessary tax management costs²

Enhanced visibility and control

Gain insights that speed decision-making in a cloud-first tax environment puts information in the right hands at the right time to improve strategic planning and identification of potential risks or opportunities.

We've conducted some reverse audits to measure how much our accuracy has improved with ONESOURCE, and it has improved considerably.
